PROFESSIONAL SUMMARY

AI Engineer and B.Tech Computer Science and Engineering graduate with hands-on experience in Machine Learning (ML), Deep Learning, Data Science, and Generative AI (GenAI). Skilled in building end-to-end Artificial Intelligence (AI) pipelines, including data preprocessing, feature engineering, model training, and deployment. Experienced in Natural Language Processing (NLP) and Retrieval-Augmented Generation (RAG) using LangChain and Large Language Models (LLMs).

EDUCATION

Bachelor of Technology (Sep 2022 – Jul 2026)
Computer Science and Engineering CGPA: 7.5 / 10
Central University of Jammu, J&K

EXPERIENCE/INTERNSHIP

- **AI Engineer – Dhruva Technology** *(Jul 2026 – Present)*
  - Building **LLM**-powered and **RAG**-based applications for production use cases.
  - Developing **Generative AI** pipelines with Python, LangChain and FastAPI, from prototyping to deployment.
- **AI Intern – National Informatics Center (NIC)** *(Jan 2026 – Jun 2026)*
  - Engineered a **RAG**-based document intelligence system using LangChain, ChromaDB, and FastAPI.
  - Developed an **LLM**-powered land information chatbot with semantic search and vector embeddings.
  - Built end-to-end **Generative AI** pipelines for document processing, retrieval, and Question Answering.
- **Machine Learning Intern – Vaishnav Technologies** *(Jun 2025 – Dec 2025)*
  - Developed **Machine Learning (ML)** models using **Python**, Scikit-learn, Pandas, and NumPy.
  - Applied data preprocessing, feature engineering, and model evaluation techniques.
  - Built end-to-end ML pipelines for classification, prediction, and deployment.
- **GenAI Intern – Innomatics Research Labs** *(Jan 2025 – Jul 2025)*
  - Developed **LLM**-based applications with prompt engineering and GenAI workflows.
  - Designed and optimized prompts for improved reasoning and context handling.
  - Built end-to-end **GenAI** pipelines for intelligent AI applications.

PROJECTS

- **AyuScan – AI Health Analyzer**
  - Developed a **Computer Vision**-based system to detect visible health indicators from facial images.
  - Applied OpenCV and HSV color analysis techniques for feature extraction.
  - Deployed an end-to-end Flask web application for image processing and result visualization.
- **WildGuard AI – Anonymous Wildlife Crime Reporting System**
  - Built an AI-powered Telegram bot for automated wildlife crime classification.
  - Implemented secure MySQL-based storage with real-time admin alerting.
  - Designed a privacy-first architecture enabling fully anonymous reporting.
- **Financial Deep Research Agent**
  - Built a **multi-agent GenAI system** for financial research using query planning and sector-based routing.
  - Integrated **RAG (ChromaDB)**, web search, and financial APIs for company and market analysis.
  - Implemented **Python** financial metrics and deployed via **LangGraph/CrewAI + FastAPI**.

SKILLS

- **Programming Languages**: Python, C, C++, Java, SQL
- **Artificial Intelligence (AI) / Machine Learning (ML)**: Deep Learning, Natural Language Processing (NLP), Computer Vision, Fine-Tuning, Prompt Engineering
- **Tools/Technologies**: Linux, Git/GitHub, MySQL, XAMPP, Docker, Jupyter Notebook, Power BI
- **Libraries/Frameworks**: Manim, TensorFlow, PyTorch, Scikit-learn, NLTK, OpenCV, Flask, FastAPI, LangChain, RAG, MCP
